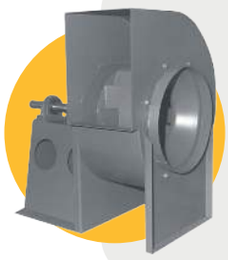
KOGI Environmental Solutions

CINCINNATI FAN

Cincinnati Fan, with over 60 years of experience, is a leader in designing and manufacturing **high-quality industrial fans.**



Centrifugal Fans

Centrifugal fans are customizable with various wheel sizes, housing widths, and materials, ideal for high-volume air movement in applications like **dust collection and moisture removal.**

Centrifugal Blowers

Centrifugal blowers are designed for high-pressure air movement, offering customizable wheel sizes, housing widths, and materials to suit demanding applications like **pressurization and dust collection.**

Axial Fans

Axial fans are ideal for moving large volumes of air at low pressures, **offering versatile options like tube fans, panel fans, and air circulators**, with customizable materials and both direct or belt drive models.

Dust Collectors

Dust collectors are designed for efficient air filtration, offering portable and stationary models with durable construction to effectively **capture dust, fumes, and particles in industrial applications.**

Portable Fume Exhauster

Portable Fume Exhauster is a **lightweight, compact solution designed for efficient removal of smoke, fumes, and fine dust**, featuring high mobility and durable construction for versatile industrial use.

Custom Air Extraction Systems

Custom fans and blowers are **tailored to meet unique application needs**, offering flexible designs with various materials, sizes, and configurations to ensure optimal performance in demanding environments.
